

# Rook's Gallery Record

**COMPLETE TO COLLECT****Sapphire Crystal**

Level 2 · 4 Glints

**ROOK'S RECORD**

Rook is checking one delivery in the Jewelhouse Gallery. Every note in the record is true.

Rook checks the Gallery cases.

**TURN EACH NOTE INTO AN EQUATION**

Use only the numbers in that note. You may add or subtract.

- Twelve sun tiles and 7 moon tiles arrived. Nineteen tiles arrived altogether.  
\_\_\_\_\_

- From the 19 delivery tiles, Rook put 8 in the high case. Eleven remained for the low case.  
\_\_\_\_\_

- The high case holds 8 tiles. The low case holds 11. Together, the cases hold all 19 tiles.  
\_\_\_\_\_

- Of the 11 low-case tiles, 5 are round and 6 are square.  
\_\_\_\_\_

- The low case has 11 tiles. That is 3 more than the high case's 8 tiles.  
\_\_\_\_\_

- Write a **different** equation for the last note. Use 8, 3, and 11 again.  
\_\_\_\_\_
